"Adaptable Web Developer skilled in JavaScript, React, Express.js, MongoDB, and Next.js. Passionate about creating user-centric applications, with a focus on efficiency and optimal performance. Demonstrated ability to learn quickly and adapt to new technologies."

Projects

News Application

https://nexus-news-5bb9e.web.app
https://github.com/naimuddin94/nexus-news
Duration 5 days

- React, Firebase, Express, MongoDB
- Created a feature-rich React-Express news app with admin controls for publishers, Stripe payments, secure user access using Firebase and JWT, cloud-based image uploads, categorized news filters, and a powerful search by tags, publishers, and titles.

Travel Application

https://travlog-a6efa.web.app
https://github.com/naimuddin94/travel-client
Duration 4 days

- React, Typescript, Firebase, Express, MongoDB
- Discover a tailor-made travel application offering personalized travel service creation and management. Embrace seamless search functionalities, empowering users to curate and manage their own unique travel experiences.

Event Management App

https://event-sphere-40ba1.web.app
https://github.com/naimuddin94/event-management
Duration 3 days

- React, Firebase
- Crafted a vibrant and uniquely designed project, boasting a colorful aesthetic personally curated for an engaging user experience. The design elements are meticulously chosen to reflect creativity and captivate users with an inviting and visually appealing interface.
